Research Tools and Resources

Duke Office of Research Initiatives
A joint collaboration between the OVPR, Duke SOM, and the CTSI
Duke is a BIG place. Resources and people can be hard to find. Lots of groups offer services – how can you wade through it all?
Mission of the navigators

Make research easier by connecting researchers to resources, opportunities, programs, colleagues

myRESEARCHnavigators help investigators:
• identify relevant resources,
• connect with experts, and
• understand processes and best practices for performing research at Duke
Three primary services

- Researcher onboarding/consultation
- Hotline/quick consults
- Scheduling presentations for research groups (you tell us what you need, we assemble the right experts)

All services are supported by the CTSA, and carried out by research staff at Duke with a variety of backgrounds
Who are we?

Rebecca Brouwer, MS, Director
- Social sciences, public health, global research, clinical research

Kristine Glauber, PhD, Program Coordinator
- Team science, biochemistry

Emily Miller, PhD, Clinical Trials Program Leader
- Genetics/cell biology, basic sciences

Sunita Patil, PhD, Research Program Leader
- Clinical research, translational research
What is it?

• 1:1 consultation, tailored to researcher – 60-90 min
• Increase awareness, understanding of processes, offices, resources, collaborators
• Provides overview of key systems
• Ensure ongoing connection to myRESEARCHnavigators

Who:

• New researchers, or those evolving into researchers
• Faculty wishing to learn about resources for self or mentees

How do we identify the researcher?

• New SOM faculty hire list
• Referrals
What is it?
• Quick answers to questions related to research
  o How to do something
  o Where to find a resource/policy/person
• A way to avoid spinning wheels, chasing answers

Who:
• Anyone! Faculty, staff, trainees engaged in research
